

PROFILE

12+ years in technology, growing from embedded / microcontroller programming through 20+ mobile and web products to technical leadership. Currently Deputy CTO at Fractal, overseeing multiple projects in parallel and accountable for architecture, code quality, technical hiring and working with enterprise clients.

Turning business problems into reliable production systems for enterprises, across retail, e-commerce, distribution, loyalty/CRM, media streaming and child nutrition.

CAREER PROGRESSION

2026	Deputy CTO
2025	Technical Leader (Abbott, Khatoco)
2023 - 2024	Web Developer + Mobile Leader
2020 - 2022	Mobile Leader (Android, iOS, Flutter)
2015 - 2020	Android Developer
2014 - 2015	Embedded Engineer (Embedded / microcontroller programming)

COMPANIES

2018 - present	Fractal Technology Corporation
2016 - 2018	FPT Software
2014 - 2015	Elitech Vietnam (now NASYS Co., Ltd.)

TECHNICAL SKILLS

Mobile	Android (Kotlin, Java, NDK), iOS, Flutter/Dart
Web	ReactJS, NodeJS
Embedded and algorithms	C/C++, STM32 (ARM), MATLAB, neural networks, algorithms and data structures
Architecture	Solution architecture, Design Patterns, RESTful API, data modeling (ERD)
Media and connectivity	Video streaming, RTSP, Socket, TCP/UDP, OpenCV
Integrations	Payments (including POS terminals), Google Maps, Google Analytics, social login
Leadership	Leading engineering teams, code review, development process, working directly with clients, collaborating with design and backend teams

SELECTED PROJECTS

Plate Tool - Zalo Mini App for child nutrition tracking

2025 - present

Role: Technical Leader · **Team:** 4 · **Tech:** Zalo Mini App, NodeJS, ReactJS

A tool that lets parents calculate calories from their child's meals, compare them with age-based nutrition standards and receive personalized reports and recommendations.

- Designed the overall architecture and set the technical direction.

Nemo - Promoter (PG) staff management app

2023 - 2024, maintained to date

Role: Web Developer, Mobile Leader · **Team:** 5 · **Tech:** Mobile App, Web Dashboard

Digitizing in-store promoter work: task assignment, promotion rollout, digital reports and KPI dashboards for managers.

- Led mobile app development and contributed to the web part.

Friso Loyalty - Customer loyalty CRM platform (FrieslandCampina Vietnam) 2022/02 - 2023/03

Role: Mobile Leader · **Team:** 3 · **Tech:** Flutter, NodeJS, ReactJS

A CRM tracking the Lead - Deal - Engage journey, with points and rewards, vouchers, membership tiers and marketing campaign automation.

- Set up the project structure, built features and aligned the data model with the backend team.
- Code review and bug fixing.

Murad - E-commerce platform 2020/06 - 2022/02

Role: Mobile Leader (Android, iOS, Flutter) · **Team:** 6 · **Tech:** Flutter, Android, iOS

An ecosystem of an e-commerce website, an internal CRM and an Affiliate/B2B Referral system for the cosmetics brand Murad.

- Led the mobile team, set up the project structure, reviewed code and coordinated with backend and web.

Khatoco (KTC) - Field sales force management platform 2019/05 - 2020/06, maintained to date

Role: Android Developer · **Team:** 6 · **Tech:** Android, .NET

An app for sales staff: customer visit logging, GPS attendance, KPI tracking, inventory management and approval workflows. Currently serves 500+ sales staff and 80 supervisors.

- Set up the project structure, built features, reviewed code and aligned the data model with backend.

BAT - Distributor management system (DMS) 2018/10 - 2019/04, maintained to date

Role: Android Developer · **Team:** 8 · **Tech:** Android, RESTful API

A distributor management system for British American Tobacco: sales team management, trade promotions, market activation, BI dashboards and KPI reporting nationwide.

- Contributed to development and have kept the system running since launch.

Abbott Detailing - Product presentation and CRM app 2018/04 - 2018/10

Role: Android Developer · **Team:** 4 · **Tech:** Android, MVP, RESTful API

Apps for each milk brand (Glucerna, Similac, Ensure) used by staff to present products and collect customer information for CRM.

- Worked with the design team on requirements and UI; built the MVP structure; aligned the data model with backend.

CapitaStar - CapitaLand deals and rewards app (Singapore) 2017/08 - 2018/04

Role: Android Developer · **Team:** 10 · **Tech:** Android, NDK, OpenCV, Google Analytics, Payment

A shopping, points and rewards app for the CapitaLand mall chain, plus a separate merchant app with POS payment integration.

- Built payment features, integrated Google Analytics, and handled image processing with NDK and OpenCV.
- Built the merchant app for stores.

DIRECTV for Tablets (US) 2016/08 - 2017/08

Role: Android Developer · **Team:** 10 · **Tech:** Android, Video Streaming

An app for watching movies, shows and sports on Android tablets, managing recordings and casting to TV, with social interaction while watching.

- Fixed bugs and improved features on the streaming platform.

ONVIF Viewer - IP camera viewing and control app 2015/07 - 2016/07

Role: Android Developer · **Team:** 3 · **Tech:** Android, RTSP, Socket, Video Streaming, MVP

An app to monitor, control and configure IP cameras over RTSP, supporting a wide range of camera models.

- Built the UI with the design team; worked with the C++ and backend teams on solutions; resolved performance issues; streamed camera data over sockets.
-

Eli Remote - Remote desktop control app for Android

2015/01 - 2015/07

Role: Android Developer · **Team:** 3 · **Tech:** Android NDK, C/C++, TCP/UDP

A remote-control app for computers, phones and tablets, similar to TeamViewer.

- Built the UI with the design team, developed features at the NDK level and aligned the data model with the Windows team.

Smart Home - Voice-controlled devices

2014/08 - 2015/01

Role: Lead implementer · **Team:** 2 · **Tech:** STM32 (ARM), C/C++, MATLAB, Neural Network, RF

A microcontroller project using an STM32 chip combined with a voice-recognition algorithm in MATLAB to control devices by voice over RF.

- Designed the STM32 and transceiver circuits, connected to a computer over USB, collected sample data, then trained and deployed the recognition model.

EDUCATION AND CERTIFICATION

Posts and Telecommunications Institute of Technology (PTIT)

Electrical and Electronic Engineering Technology · GPA 7.62/10

Android ATC AND-401

Android Application Development, Android Advanced Training Consultants
